PROJECT^{data}

ARNOLD ARBORETUM, HARVARD UNIVERSITY

Jamaica Plain, Massachusetts USA

Commissioned by: Harvard University

Scope: Pavilion and planting armatures in a vine and shrub garden by landscape firm Reed Hildebrand.

The pavilion and armatures are conceived of not as objects to focus on, but structures that refocus the gaze of visitors on nature and the surrounding gardens. The pavilion construction is minimalist and is used for weddings, classes and other outdoor events.

Materials: Fieldstone; pea stone; stainless steel; mahogany.

Completed: 2002

Cost: \$3,400,000

“Rather than dominate the site and its surroundings, his architecture habitually seeks the contours rather than the crest. Whether the topography is dramatic or subtle, Rose’s instinct is to reinforce the geometries of the site, at times making the viewers more aware of the landscape than they might have been otherwise. “

Foreword by Terence Riley, formerly The Philip Johnson Chief Curator of Architecture and Design, Museum of Modern Art from the monograph, [Charles Rose, Architect](#), Princeton Architectural Press, 2006

Awards:

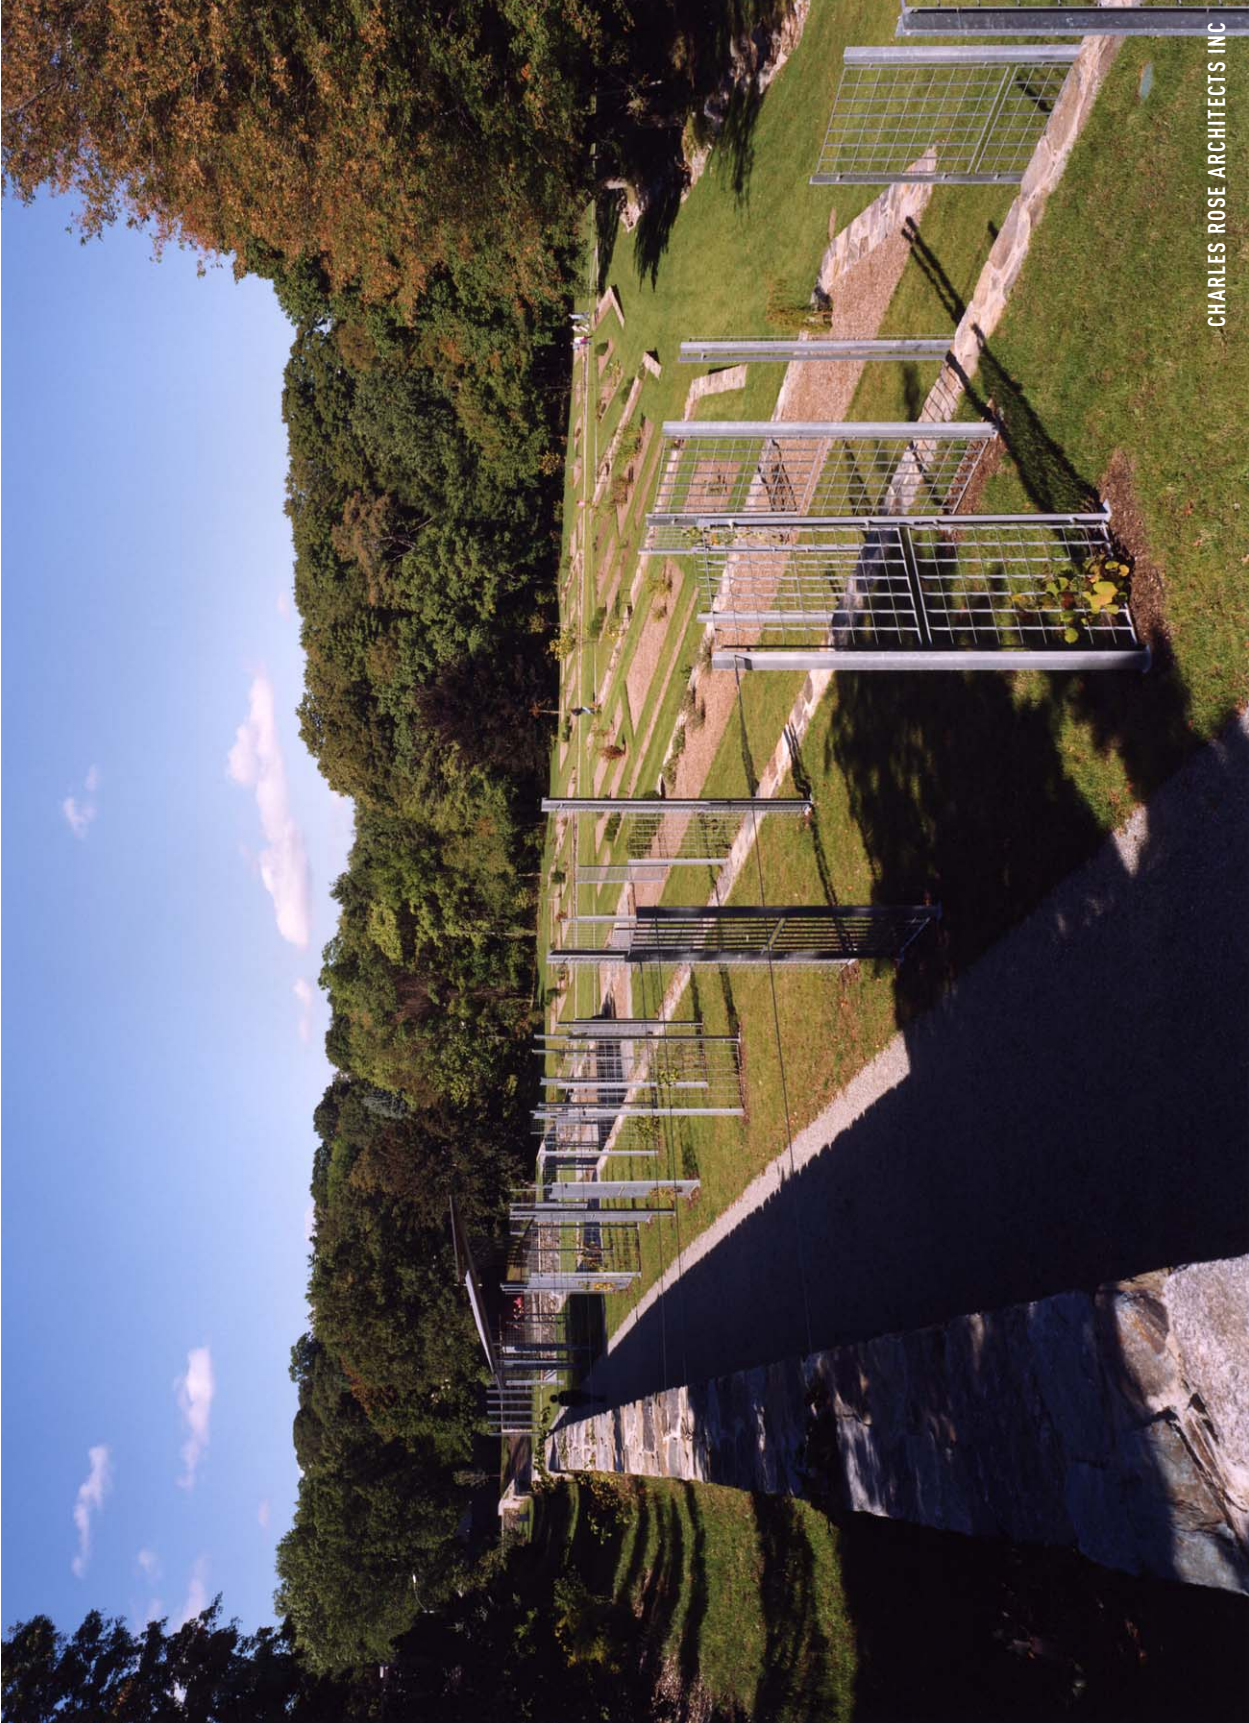

American Institute of Architects New England Honor Award for Design Excellence

Boston Society of Landscape Architects Unbuilt Honor Award
